

CARGO ACCEPTANCE PROCEDURES GENERAL REQUIREMENTS

- A. At the time of acceptance, the indirect air carrier shall inspect all cargo for visual signs of tampering, exposed wires, or leaks which may render the cargo unsafe to transport. Any cargo which appears to have been tampered with, has exposed wires, or shows evidence of leakage may not be tendered for transportation. This procedure requires an exterior visual examination of containers or packaging and does not require breaking down cargo that would not otherwise require breakdown under this security program.
- B. Where a Shipper's Security Endorsement (SSE) is required, it shall contain the following language and information:

"I certify that this cargo does not contain any unauthorized explosives, incendiaries, or hazardous materials. I consent to a search of this cargo. I am aware that this endorsement and original signature, along with other shipping documents, will be retained on file for at least thirty days."

Shipper's/Company Name:	Date:
Signature of Shipper or Authorized Representative:	
Print/Type Name of Individual Whose Signature Appears as Shipper or Authorized Representative:
